## EQUIPMENT RENTAL CATALOG

## ABOUT US

- ▶ The Owner of BOP Products, LLC, announces the creation of a new subsidiary LLC; Pressure Control Products, LLC Rental Division.
- ▶ The LLC exists as a subsidiary LLC of BOP Products, LLC. The owner took this action to form the division October 2021.
- ▶ This action was taken by the owner in response to the growth seen from the rental division of BOPP. The need to keep the quality system in place for BOPP while allowing the rental division to work outside of that and create their own system for working Pre & Post Rental Inspections. BOPP has worked diligently for years to acquire and maintain their API accreditations and hold those as very valuable assets. This separation will allow both divisions to work together but also keep their own quality standards in place.
- ▶ Pressure Control Products with the support of BOPP share the vision to be the world leading rental supplier of pressure control products and related services. We will earn our clients respect and loyalty through continuous improvements, guided by the: Responsiveness, Reliability, and Readiness of our PCP Team.
